Choose from nine powdered Stucco Color Packs that deliver colorful stucco finishes when used with Sakrete Stucco Finish Coats.

SAFETY:

READ and UNDERSTAND the Material Safety Data Sheet (MSDS) before using this product. WARNING: Wear protective clothing and equipment. For emergency information, call CHEMTREC at 800-424-9300 or 703-527-3887 (outside USA). KEEP OUT OF REACH OF CHILDREN.

MIXING:

1. Using a mechanical plaster mixer, mix one (1) 80 lb. bag of the appropriate stucco finish with portable water to a thin consistency until it is smooth and free of lumps.
2. Add all color packs to be used for one batch and mix until color is evenly dispersed. (Approximately 1 to 2 minutes)
3. Thin the mixture with water, then add remaining stucco base to correspond with the number of color packs mixed in step 2.
4. For additional batches of the same material and color, thin the remaining mixture and repeat steps 2 and 3.

NOTE: All cement/lime products should be mechanically mixed for a minimum of twenty (20) minutes after the last bag of stucco base is added.

SAKRETE® Stucco Color may also be used in other SAKRETE® stucco products. Please note that different color values will be obtained when the same color is added to different base products. The colors are approximations. The actual final color may vary slightly. Color perception is affected by degree of gloss, texture and lighting conditions. For best results, always request a product sample. Select colors under natural lighting conditions. Avoid installing new finish adjacent to weathered or aged finish. The SAKRETE® Companies will not be responsible for shade or color variations caused by application or substrate deficiencies, or fading resulting from natural causes such as weather.
