Curing:
Allow to air-cure for 72 hours prior to traffic.

Precautions:
Air, mix and substrate temperatures should be between 50°F (10°C) and 90°F (32°C) and no rain in the forecast within 24 hours of application. For applications outside this range of temperatures and conditions, contact Sakrete Technical Service.
- Colder temperatures or higher humidity conditions will retard set times.
- Protect from freezing for 48 hours

NOTE: Proper application and installation of all Sakrete products are the responsibility of the end user.

Safety:
READ and UNDERSTAND the Safety Data Sheet (SDS) before using this product.
WARNING: Wear protective clothing and equipment. For emergency information, call CHEMTREC at 800-424-9300 or 703-527-3887 (outside USA).
KEEP OUT OF REACH OF CHILDREN.

Limited Product Warranty:
The manufacturer warrants that this product shall be of merchantable quality when used or applied in accordance with the manufacturer’s instructions. This product is not warranted as suitable for any purpose other than the general purpose for which it is intended. This warranty runs for one (1) year from the dates the product is purchased. ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ON THIS PRODUCT IS LIMITED TO THE DURATION OF THIS WARRANTY. Liability under this warranty is limited to replacement or defective products or, at the manufacturer’s option, refund of the purchase price. CONSEQUENTIAL AND INCIDENTAL DAMAGES ARE NOT RECOVERABLE UNDER THIS WARRANTY.

Features:
- Weather resistant - fills and seals cracks
- Paintable after curing

Use For:
- Repairing cracks from 1/8” to 3/8” (3.2 to 9.5 mm) wide in concrete slabs

Technical Data:
DIVISION 7
Joint sealants - 07 92 00

Color:
Gray

Preparation/Application:
For best results all materials should be stored between 50°F (10°C) and 80°F (27°C) 24 hours prior to installation.

1. Clean cracks using a garden hose and/or putty knife removing all debris from crack.
2. Cracks should be at least 1/8” (3.2 mm) wide. Using a chisel widen crack as needed.
3. Deep cracks should be filled with sand to within 3/8” (9.5 mm) of the surface.
4. Cut tube nozzle to desired bead width and puncture seal at the inside base of the tip.
5. Squeeze Concrete Repair into the crack using a standard caulking gun.
6. Smooth and trim off excess caulk with a moist putty knife or trowel while material is still wet.
